

Welcome to Intank Services

Intank Services was founded in 2003 and has grown to be a vital source of technical knowledge and assistance to the petroleum industry and oil tanker operations in the Asia Pacific region and further afield.

We routinely conduct work on behalf of major oil companies, providing proactive measures in support of quality control at the ship/shore interface as well as long term loss control projects at petroleum refineries.

We are consummate professionals dedicated to the principles of quality management, which we apply rigorously to all our endeavours. We are proud of our blemish free record and defend our reputation by applying the strictest quality standards to all our projects.

Intank Services powers performance by drawing on the collective experience of our consultants to generate real time solutions to problems and obstacles affecting our clients business. Through the success of our clients' business, we also achieve success.
